Street Light Fault Detection & Repair Program

OWNER	JERSEY CENTRAL POWER & LIGHT COMPANY
Location	North & Central New Jersey
Project Value	\$ 4,100,000
Completion date	March 2009
Major Challenge	Repairing faults under roadways and walkways
General Contractor	JBL Electric, Inc.
DESCRIPTION OF WORK	
<p>JBL was selected as the General Contractor to repair 1,665 street lights throughout NJ. The detection of the faults, many which were extremely hard to locate and uncover, and then the corresponding repair, was under a very tight schedule for completion.</p> <p>JBL used underground detection equipment to determine the location of each fault. Difficult faults required the use of a directional boring machine and backhoe.</p>
